Goat anti Human Factor XII, Clone: [Polyclonal], Monoclonal NMB-GAHU/FXII

Artikelname	Goat anti Human Factor XII, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAHU/FXII
Hersteller Artikelnummer	GAHu/FXII
Alternativnummer	NMB-GAHU/FXII
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Produktbeschreibung	The defined antibody reactivity is restricted to FXII, FXIIa and complexes of FXIIa with other proteins. In immunoelectrophoresis, bi-dimensional electrophoresis and radial immunodiffusion (Ouchterlony) against normal plasma, a single precipitin line...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
UniProt	P00748
Puffer	Delipidated, heat inactivated, lyophilized, stable whole serum. No preservative added. Total protein concentration in the antiserum is about 50 mg/ml, the IgG concentration about 10 mg/ml. No foreign proteins added. Reconstitute the lyophilized antiserum
Quelle	Factor XII (Hageman factor) is a single chain glycoprotein (MW 80,000). It is a serine protease zymogen. FXII is converted to an active enzyme by damage to vascular endothelium. In vitro activation is caused by glass or kaolin. Surface binding promotes ac

Formel	Delipidated, heat inactivated, lyophilized, stable whole serum. No preservative added. Total protein concentration in the antiserum is about 50 mg/ml, the IgG concentration about 10 mg/ml. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. The antiserum concentration required in the gel is normally between 1 and 2%.
