Goat anti Human fibrinogen, Clone: [Polyclonal], Monoclonal NMB-GAHU/FBG

Artikelname	Goat anti Human fibrinogen, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAHU/FBG
Hersteller Artikelnummer	GAHu/Fbg
Alternativnummer	NMB-GAHU/FBG
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to fibrinogen. In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), using various antiserum concentrations against fresh normal human plasma a single precipitin line is obtained which shows ...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
UniProt	P02671
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added. Reconstitute the lyophilized ant
Quelle	Fibrinogen (clotting factor I) is a heat labile beta glycoprotein (molecular weight 340,000) and consists of three pairs of chains bound by disulphide bonds. It is synthesized in hepatocytes under genetic control. It is the precursor of fibrin, which is t

Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. Dilutions may be prepared by adding phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the antiserum. Diluted antiserum should be stored at +4C, not refrozen, and preferably used the same day.
