Product Datasheet

Goat anti Human prealbumin, Clone: [Polyclonal], Monoclonal NMB-GAHU/PALB

Artikelname	Goat anti Human prealbumin, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAHU/PALB
Hersteller Artikelnummer	GAHu/pAlb
Alternativnummer	NMB-GAHU/PALB
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Produktbeschreibung	The defined antibody specificity is directed to transthyretin as tested against human sera. In immunoelectrophoresis and double radial immunodiffusion (Ouchterlony), using various antiserum concentrations against appropriate concentrations of the imm...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
UniProt	P02766
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those in pooled goat serum. No foreign proteins added. Reconstitute the lyophilized antiserum
Quelle	Transthyretin is the fastest protein in the immunoelectrophoresis pattern of human serum. It consists of four identical polypeptide chains with no carbohydrate The molecular weight is 55,000 and the concentration in normal serum ranges from 0.1 to 0.4 mg/

Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those in pooled goat serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis use 2 µl serum, plasma or equivalent against 120 µl antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 µl antiserum in a 3 mm diameter centre well and 2 µl serum samples (neat and serially diluted) in 2 mm diameter peripheral wells. In single radial immunodiffusion and electroimmunodiffusion use 0.5 to 1.0 percent antiserum in the agar gel.
