Goat anti Mouse fibrinogen, conjugated with FITC, Clone: [Polyclonal], Monoclonal NMB-GAM/FBG/FITC

Artikelname	Goat anti Mouse fibrinogen, conjugated with FITC, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAM/FBG/FITC
Hersteller Artikelnummer	GAM/Fbg/FITC
Alternativnummer	NMB-GAM/FBG/FITC
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Konjugation	FITC
Produktbeschreibung	The reactivity of the antiserum is restricted to fibrinogen. In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), using various antiserum concentrations against normal mouse plasma a single precipitin line is obtained which shows a reac...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
Puffer	Fluorochrome-coupled purified hyperimmune IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody activity.

Quelle	Fibrinogen (clotting factor I) is a heat labile beta glycoprotein present in plasma. It is the precursor of fibrin, which is the key protein constituting the network of the blood clot. Thrombin converts fibrinogen to fibrin by limited proteolysis. Fibrin
Formulierung	FITC
Formel	Fluorochrome-coupled purified hyperimmune IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody activity.
Anwendungsbeschreibung	ELISA, Immunocytochemistry, Immunohistochemistry (frozen), (In)direct immunofluorescence. The lyophilized conjugate is shipped at ambient temperature and may be stored at +4C, prolonged storage at or below -20C. It is reconstituted by adding 1 ml sterile distilled water, spun down to remove insoluble particles, divided into small aliquots, frozen and stored at or below -20C. Prior to use, an aliquot is thawed slowly in the dark at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided.
