Goat anti Rabbit milk proteins, Clone: [Polyclonal], Monoclonal NMB-GAR/TM

Artikelname	Goat anti Rabbit milk proteins, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAR/TM
Hersteller Artikelnummer	GAR/TM
Alternativnummer	NMB-GAR/TM
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Produktbeschreibung	In immunoelectrophoresis against rabbit milk precipitation of not less than 8 different proteins may be obtained. However the number of visible precipitin lines varies widely among individual specimens of rabbit milk. The total concentration of prote...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added. Reconstitute the lyophilized an
Quelle	Pooled whole rhesus rabbit milk. Freund's complete adjuvant is used in the first step of the immunization procedure.

Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis use 2 µl serum or equivalent against 120 µl antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 µl antiserum in 3 mm diameter center well and 2 µl serum samples (neat and serially diluted in 2 mm diameter peripheral wells. Different bleedings of the immunized animals are pooled to obtain a broad spectrum balanced against the varying concentrations of the individual serum protein components.
