Product Datasheet

Rabbit anti Human beta-1 hemopexin, Clone: [Polyclonal], Monoclonal NMB-RAHU/HPX

Artikelname	Rabbit anti Human beta-1 hemopexin, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-RAHU/HPX
Hersteller Artikelnummer	RAHu/Hpx
Alternativnummer	NMB-RAHU/HPX
Hersteller	NordicMubio
Wirt	Rabbit
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to hemopexin as tested in immunoelectrophoresis and radial immunodiffusion. A characteristic single precipitin line is obtained with normal serum which shows a reaction of identity with the precipitin lin...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
UniProt	P02790
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal rabbit serum. No foreign proteins added. Reconstitute the lyophilized

Quelle	Hemopexin is a haem-binding -globulin present in normal serum at a concentration of 0.8 to 1.0 mg/ml. Its molecular weight is 57,000. The carbohydrate content is 23%. It consists of one polypeptide chain. Purified hemopexin isolated from pooled human seru
Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal rabbit serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis use 2 µl serum or equivalent against 120 µl antiserum. In double radial immunodiffusion use a rosette arrangement with 10 µl antiserum in 3 mm diameter centre well and 2 µl serum samples (neat and serially diluted) in 2 mm diameter peripheral wells.
