| Quelle | C3a is a component of complement C3 produced by its activation. It has a molecular weight of 8,900. The protein is isolated and purified from pooled normal human plasma. Freund's complete adjuvant is used in the first step of the immunization procedure. |

| Formel | Delipidated, heat inactivated, lyophilized, stable whole serum. No preservative added Total protein and IgG concentrations in the antiserum are comparable to those of normal pooled rabbit serum. No foreign proteins added. |
| Anwendungsbeschreibung | Precipitation assays. In immunoelectrophoresis in agarose-plates use 2 µl human plasma or equivalent against 120 µl antiserum. In double radial immunodiffusion use a rosette arrangement with 10 µl antiserum in 3 mm diameter center well and 2 µl plasma samples (neat and serially diluted) in 2 mm diameter peripheral wells. |
