Product Datasheet

Rabbit anti Human C4 binding protein, Clone: [Polyclonal], Monoclonal NMB-RAHU/C4BP

Artikelname	Rabbit anti Human C4 binding protein, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-RAHU/C4BP
Hersteller Artikelnummer	RAHu/C4bp
Alternativnummer	NMB-RAHU/C4BP
Hersteller	NordicMubio
Wirt	Rabbit
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to C4 binding protein. In immunoelectrophoresis and radial immunodiffusion, using various antiserum concentrations against human plasma a single precipitin line is obtained and shows a reaction of full id...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
UniProt	P04003
Puffer	Delipidated, heat inactivated, lyophilized, stable antiserum. No preservative added, Total protein and IgG concentrations in the antiserum are comparable to those of normal pooled rabbit serum. No foreign proteins added. Reconstitute the lyophilized antis

Quelle	C4-binding protein is a plasma protein with a molecular weight of 500,000 and consists of 6 chains. Its concentration in serum is about 250 µg/ml. It is one of the inhibitors of the complement activation system. The protein combines up to six molecules of
Formel	Delipidated, heat inactivated, lyophilized, stable antiserum. No preservative added, Total protein and IgG concentrations in the antiserum are comparable to those of normal pooled rabbit serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis in agarose-plates use 2 µl human plasma or equivalent against 120 µl antiserum. In double radial immunodiffusion use a rosette arrangement with 10 µl antiserum in 3 mm diameter center well and 2 µl plasma samples (neat and serially diluted) in 2 mm diameter peripheral wells.
