| Alternativnummer         | ENZ-ALX-581-011-L001-1                                                                                                                                                                                                                 |
| Hersteller               | Enzo Life Sciences                                                                                                                                                                                                                     |
| Kategorie                | Sonstiges                                                                                                                                                                                                                              |
| Quelle                   | Smooth (S)-form LPS, isolated and purified from Salmonella typhimurium by modification of the phenol water extraction and PCP method, converted to the uniform salt form and dissolved in sterile pyrogen-free double distilled water. |
| Reinheit                 | Absence of detectable protein or DNA contaminants with agonistic TLR activity.                                                                                                                                                         |
| Formulierung             | Liquid. Sterile, ready-to-use solution in pyrogen-free double distilled water.                                                                                                                                                         |
| Target-Kategorie         | TLR4                                                                                                                                                                                                                                   |
