| Hersteller               | Enzo Life Sciences                                                                                                                                                                                                                                            |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | The SDMA ELISA kit is a complete assay for the quantitative determination of symmetric dimethylarginine (SDMA) levels. This kit is to be used with EDTA-plasma and serum from human origin. The SDMA ELISA has no cross-reactivity with ADMA, NMMA or L-ar... |
| Sensitivitaet            | 0.05µmol/l (range 0.1 to 2µmol/l, expected value: 0.47µmol/l<br>0.14µmol/l)                                                                                                                                                                                   |
| Target-Kategorie         | SDMA                                                                                                                                                                                                                                                          |
| Anwendungsbeschreibung   | For the quantitative determination of symmetric dimethylarginine (SDMA) in human EDTA-plasma and serum. Does not cross-react with ADMA, NMMA or L-arginine.                                                                                                   |
