### Anti-Human TARC Antibody, Rabbit, Polyclonal ABT-ABG10531-U100

Artikelname	Anti-Human TARC Antibody, Rabbit, Polyclonal
Artikelnummer	ABT-ABG10531-U100
Hersteller Artikelnummer	ABG10531-U100
Alternativnummer	ABT-ABG10531-U100-100UG
Hersteller	Abcepta
Wirt	Rabbit
Kategorie	Antikörper
Applikation	ELISA, WB
Spezies Reaktivität	Human
Klonalität	Polyclonal
Reinheit	Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hTARC. Anti-Human TARC specific antibody was purified by affinity chromatography employing immobilized hTARC matrix.
Formulierung	A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.
Antibody Type	Polyclonal Antibody

Anwendungsbeschreibung	<p>WesternBlot: To detect hTARC by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hTARC is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.. Sandwich: To detect hTARC by sandwich ELISA (using 100 µl/well antibody solution) a concentration of 0.5 - 2.0 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems Biotinylated Anti-Human TARC (60-304BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hTARC.. Neutralization: To yield one-half maximal inhibition [ND&lt;span style=font-size: 16px,&gt;50] of the biological activity of hTARC (100 ng/ml), a concentration of 2.0-3.0 µg/ml of this antibody is required.. Reconstitution: Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.</p>
