## Product Datasheet

**CD32 (Fc Gamma RIla) Antibody - With BSA and Azide, Clone: [7.3],  
Mouse, Monoclonal  
ABT-AH11200-U0100**

|                          |                                                                                                                                                                                                                                                               |

| Produktbeschreibung      | This MAb reacts with a CD32 (FcγRII) epitope (cluster-4). It displays a stronger reaction with Daudi than with U937 cells. The epitope is located in domain 2 of FcγRIIa. Its Fab2 fragments block immune complex binding. CD32 (FcγRII) is a type 1 trans... |
