| Isotyp                   | IgG1                                         |
| UniProt                  | <a href="#">P25445</a>                       |
| Formulierung             | Liquid. In PBS, pH 7.2-7.4.                  |
| Target-Kategorie         | Fas                                          |

|                        |                                                                                                                                                                                                                                                               |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | APO-1-1 (IgG1) is an isotype-switch variant of the original clone APO-1-3 (ALX-805-020). Since undesired side reactions in immunohistochemistry are minimal for IgG1 antibodies, APO-1-1 is especially useful for immunohistology on cryostat sections and on |
