| Quelle                   | Produced in E. coli.                                                                                                                                                                                                                                       |
| Reinheit                 | Purified by multi-step chromatography.                                                                                                                                                                                                                     |
| Formulierung             | Liquid. In 50mM TRIS-HCl, pH 8.0, containing 50mM sodium chloride.                                                                                                                                                                                         |
| Target-Kategorie         | Ubiquitin                                                                                                                                                                                                                                                  |
| Anwendungsbeschreibung   | For use in deubiquitinating enzyme assays and linear polyubiquitin binding studies. Suggested uses: 1. Deubiquitinating enzyme substrates (general/linkage specific). 2. Investigation of polyubiquitin chain recognition by and interaction with ubiquiti |
