| Alternativnummer         | ENZ-BML-UW9320-0100-100                                                                                                                                                                                                                           |
| Hersteller               | Enzo Life Sciences                                                                                                                                                                                                                                |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                  |
| Produktbeschreibung      | Ubc9 (human), (recombinant) (untagged)...                                                                                                                                                                                                         |
| Molekulargewicht         | ~18kDa                                                                                                                                                                                                                                            |
| UniProt                  | <a href="#">P63279</a>                                                                                                                                                                                                                            |
| Quelle                   | Produced in E. coli as an untagged protein.                                                                                                                                                                                                       |
| Reinheit                 | Purified by ion-exchange chromatography.                                                                                                                                                                                                          |
| Formulierung             | Liquid. In 20mM HEPES, pH 7.3, containing 110mM potassium acetate, 2mM magnesium acetate, 0.8mM EGTA, and 1mM DTT.                                                                                                                                |
| Sequenz                  | Accession number: P63279, Length: 158 amino acid residues.                                                                                                                                                                                        |
| Target-Kategorie         | Conjugating enzyme [E2] Conjugating enzyme [E2]                                                                                                                                                                                                   |
| Anwendungsbeschreibung   | Uses: 1. SUMO modification of specific proteins in vitro.2. Demonstrate novel proteins are potential targets for SUMOylation under in vitro conditions.3. Generate substrates for deSUMOylating enzymes.4. Investigation of direct Ubc9-substrate |
