| Immunogen                | Lymphoblastoid cell line Daudi                                                                                                                                                                                                                                |
| Produktbeschreibung      | Recognizes a protein of 33-37kDa, identified as CD20 (Workshop V, Code CD20.12). B9E9 recognizes extracellular domain of CD20. The epitope is similar to or identical to that recognized by other CD20 antibodies including Leu-16 and B1. This MAb can be... |
