| Alternativnummer         | ROC-010-001-334                                                                                                                |
| Hersteller               | Rockland Immunochemicals                                                                                                       |
| Kategorie                | Antikörper                                                                                                                     |
| Applikation              | SDS-PAGE                                                                                                                       |
| Konjugation              | Unconjugated                                                                                                                   |
| Klonalität               | Monoclonal                                                                                                                     |
| Konzentration            | 1.0 mg/mL by UV absorbance at 280 nm                                                                                           |
| Klon-Bezeichnung         | [M2BK]                                                                                                                         |
| Isotyp                   | IgG2b                                                                                                                          |
| Puffer                   | 0.02 M Potassium Phosphate, 0.5 M Sodium Chloride, pH 7.2                                                                      |
| Quelle                   | Mouse                                                                                                                          |
| Formulierung             | Liquid (sterile filtered)                                                                                                      |
| Application Verdünnung   | ELISA: User Optimized, FLISA: User Optimized, Flow Cytometry: 1:1000-1:5000, IF Microscopy: User Optimized, WB: User Optimized |

|                        |                                                                                                                                                                                                                                   |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | Mouse IgG2b kappa isotype control has been tested in SDS-Page and can be utilized as a control or standard reagent in Flow cytometry, Western Blotting, and ELISA experiments where determination of sample isotype is important. |
