| Formulierung           | Liquid (sterile filtered)                                                                                                                                                                                                                                      |
| Antibody Type          | Primary Antibody                                                                                                                                                                                                                                               |
| Application Verdünnung | ELISA: 1:10,000 - 1:30,000, Flow Cytometry: User Optimized, IHC: 1:1,000 - 1:5,000, IF Microscopy: User Optimized, WB: 1:3,000 - 1:30,000                                                                                                                      |
| Anwendungsbeschreibung | Monoclonal anti-GFP is designed to detect enhanced GFP and GFP containing recombinant proteins. Tested in ELISA, IP, and WB and suitable in FACS, IHC, IF. This antibody can be used to detect GFP by ELISA (sandwich or capture) for the direct binding of an |
