Immunogen	This affinity purified antibody was prepared from whole rabbit serum produced by repeated immunizations with a synthetic peptide corresponding to amino acids 1-13 of Human FANCE. This Fanconi anemia protein promotes the nuclear accumulation of FANCC. FANCE protein is part of the FA nuclear complex, binding FANCC & FANCD2. It is required for the nuclear accumulation of FANCC and provides a bridge between the FA complex and FANCD2. FANCC mutants do not bind FANCE or prevent chromosome breakage.
