| Alternativnummer         | ROC-WM1366-01-0001                                                                                                                                                                                                                                                        |
| Hersteller               | Rockland Immunochemicals                                                                                                                                                                                                                                                  |
| Kategorie                | Zellen/Zellkultur                                                                                                                                                                                                                                                         |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                              |
| Produktbeschreibung      | WM1366 is a tumorigenic (VGP) primary melanoma cell line with competence for metastasis. This cell line was established from a right forearm in a 79-year-old male with stage IV superficial spreading melanoma. WM1366 cells produce xenograft tumors whe...             |
| Konzentration            | 1.0 million cells/mL (Count By Hemocytometer)                                                                                                                                                                                                                             |
| Puffer                   | None                                                                                                                                                                                                                                                                      |
| Quelle                   | Human                                                                                                                                                                                                                                                                     |
| Formulierung             | Frozen Cell Suspension                                                                                                                                                                                                                                                    |
| Anwendungsbeschreibung   | The key applications of these cell lines include genetic studies, xenograft production, drug testing, and drug target discovery. These cell line models can be used in various biological assays, and for identifying critical target genes, and cell signaling pathways. |
