| Kategorie                | Zellen/Zellkultur                                                                                                                                                                                                                                             |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | Non-viable cell pellet was generated from cell line WM1799. WM1799 is a metastatic human melanoma cell line. This cell line features the specific V600E (Val600Glu) mutation at codon 600 in the BRAF gene. This mutation causes constitutively active kin... |
| Konzentration            | 5.0 million cells (Count By Hemocytometer)                                                                                                                                                                                                                    |

| Formulierung             | Frozen Cell Pellet                                                                                                                                                                                                                                            |
| Anwendungsbeschreibung   | Frozen non-viable cell pellets can be used for in vitro experiments such as Western blotting and other immunoassays, genomic DNA isolation, STR profiling, and RNA isolation.                                                                                 |
