## Product Datasheet

### **WM3456 Viable Cells** **ROC-WM3456-01-0001**

|                          |   |
|--------------------------|---|
| Artikelname              | WM3456 Viable Cells   |
| Artikelnummer            | ROC-WM3456-01-0001  |
| Hersteller Artikelnummer | WM3456-01-0001  |
| Alternativnummer         | ROC-WM3456-01-0001  |
| Hersteller               | Rockland Immunochemicals  |
| Kategorie                | Zellen/Zellkultur   |
| Konjugation              | Unconjugated  |
| Produktbeschreibung      | WM3456 is a human metastatic melanoma cell line that displays a thin elongated, fibroblastic morphology. This cell line contains a Q61K mutation at position 61 in the N-RAS gene which causes increased signaling via the extracellular signal-regulated ...             |
| Konzentration            | 1.0 million cells/mL (Count By Hemocytometer)   |
| Puffer                   | None  |
| Quelle                   | Human   |
| Formulierung             | Frozen Cell Suspension  |
| Anwendungsbeschreibung   | The key applications of these cell lines include genetic studies, xenograft production, drug testing, and drug target discovery. These cell line models can be used in various biological assays, and for identifying critical target genes, and cell signaling pathways. |
