| Puffer                   | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                            |
| Reinheit                 | >90% by SDS-PAGE                                                                                                                                                                                                                                              |

|                  |                                                                                                                                                                                                                                                                |
