| Produktbeschreibung      | Recombinant Human Carbonyl reductase [NADPH] 1 (CBR1) is a purified Recombinant Protein. Purity: >90% as determined by SDS-PAGE. Host: E. coli. Endotoxin Level: Not Tested. Species: Human (Homo sapiens). Target Name: CBR1. Target Synonyms: 15-hydroxy... |
| Molekulargewicht         | 34.2kDa                                                                                                                                                                                                                                                       |
| Tag                      | N-Terminal 6Xhis-Tagged                                                                                                                                                                                                                                       |
| Puffer                   | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                            |

|                  |                                                                                                                                                                                                                                                                                |
