| Produktbeschreibung      | Recombinant <i>Xanthomonas campestris</i> pv. <i>campestris</i> NAD-dependent protein deacetylase (cobB) is a purified Recombinant Protein. Purity: >90% as determined by SDS-PAGE. Host: <i>E. coli</i> . Endotoxin Level: Not Tested. Species: <i>Xanthomonas campestris</i> pv. <i>camp...</i> |
| Molekulargewicht         | 48.1kDa                                                                                                                                                                                                                                                                                           |
| Tag                      | N-Terminal 6Xhis-Sumo-Tagged                                                                                                                                                                                                                                                                      |
| Puffer                   | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                                                                |

|                  |                                                                                                                                                                                                                                                                                      |
