| Hersteller               | Abnova                                                                                                                                                                                                                                                        |
| Kategorie                | Sonstiges                                                                                                                                                                                                                                                     |
| Applikation              | Conjugation, FC                                                                                                                                                                                                                                               |
| Produktbeschreibung      | Fluorescence Dye 630-M with Streptavidin conjugate. All the Fluorescent Dye M series products are designed to be maximally excited by one of the major light sources equipped in flow cytometers. Besides, in comparison with phycobiliprotein tandems, Fl... |
| Puffer                   | Water                                                                                                                                                                                                                                                         |
| Application Verdünnung   | Labeling via Streptavidin for fluorescence imaging and other fluorescence-based biochemical analysis. For most fluorescent streptavidin applications, a concentration of 1-20 ug/mL is sufficient. The optimal working dilution should be determined by the   |
