| Spezies Reaktivität      | Human                                                                                                                                                                                                                    |
| Produktbeschreibung      | ROS1 Split CISH Probe is designed for the qualitative detection of translocations involving the human ROS1 gene at 6q22.1 in formalin-fixed, paraffin-embedded specimens by chromogenic in situ hybridization (CISH).... |
| Formulierung             | Liquid                                                                                                                                                                                                                   |
| Application Verdünnung   | The product is ready-to-use. No reconstitution, mixing, or dilution is required. Bring probe to room temperature (18-25C) and mix briefly before use.                                                                    |
