| Immunogen                | Recombinant full-length human CD45RA protein                                                                                                                                                                                                                  |
| Produktbeschreibung      | Recognizes a protein of 205 kDa-220 kDa, identified as CD45RA (Workshop III). CD45RA is isoforms of the human leukocyte common antigen (CD45). Human CD45 contains three exons which encode peptide segments designated A, B and C, respectively. The diff... |
