| Spezies Reaktivität      | Mouse                                                                                                                                                                                                                                                         |
| Immunogen                | Purified recombinant Mouse CD40 fusion protein                                                                                                                                                                                                                |
| Produktbeschreibung      | Upon binding to its ligand CD154, CD40 acts as a costimulatory molecule for the activation of B cells, dendritic cells, monocytes, and other APCs. CD40 plays roles in B cell activation, differentiation, proliferation and Ig isotype switching as well ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.2 mg/mL                                                                                                                                                                                                                                                     |
| Klon-Bezeichnung         | [FGK45.5]                                                                                                                                                                                                                                                     |
| Molekulargewicht         | 48 kDa                                                                                                                                                                                                                                                        |
