| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Human recombinant NKX2.8 protein fragment (around aa 10-123) (exact sequence is proprietary)                                                                                                                                                                  |
| Produktbeschreibung      | The protein encoded by this gene is a homeobox-containing developmental regulator associated with liver development. The encoded protein binds to the alpha-fetoprotein (AFP) gene promoter and increases the expression of AFP. This gene is overexpresse... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.2 mg/mL                                                                                                                                                                                                                                                     |
| Klon-Bezeichnung         | [NKX28/3233R]                                                                                                                                                                                                                                                 |

|                        |                                                                                                                                                                                                                                                             |
