| Immunogen                | Recombinant full-length human Moesin protein                                                                                                                                                                                                                  |
| Produktbeschreibung      | This antibody recognizes 78 kDa moesin protein. Moesin, a member of the talin-4.1 superfamily, is a linking protein of the sub-membranous actin cytoskeleton. It is expressed in variable amounts in cells of different phenotypes such as macrophages, ly... |
