| Immunogen                | Recombinant full-length human HPCA1 protein                                                                                                                                                                                                                   |
| Produktbeschreibung      | This antibody recognizes a transmembrane, heavily glycosylated protein of 90-120 kDa, which is identified as CD34. Its expression is a hallmark for identifying pluripotent hematopoietic stem or progenitor cells. Its expression is gradually lost as li... |
