| Immunogen                | The antiserum was produced against synthesized peptide derived from human APLP2 around the phosphorylation site of Tyr755. AA range:714-763                                                                                                                   |
| Produktbeschreibung      | This gene encodes amyloid precursor- like protein 2 (APLP2), which is a member of the APP (amyloid precursor protein) family including APP, APLP1 and APLP2. This protein is ubiquitously expressed. It contains heparin-, copper- and zinc- binding domai... |

| Quelle                   | Polyclonal, Rabbit IgG                                                                                                                                                                                                                                        |

|                        |                                                                                                                       |
|------------------------|-----------------------------------------------------------------------------------------------------------------------|
| Reinheit               | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. |
| Formulierung           | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.                                               |
| Application Verdünnung | IHC 1:100 - 1:300. ELISA: 1:20000.. IF 1:50-200                                                                       |
