| Immunogen                | The antiserum was produced against synthesized peptide derived from human DGKQ. AA range:691-740                                                                                                                                                              |
| Produktbeschreibung      | The protein encoded by this gene contains three cysteine-rich domains, a proline-rich region, and a pleckstrin homology domain with an overlapping Ras-associating domain. It is localized in the speckle domains of the nucleus, and mediates the regener... |
