| Immunogen                | Synthesized peptide derived from human BYST AA range: 127-177                                                                                                                                                                                                 |
| Produktbeschreibung      | Bystin is expressed as a 2-kb major transcript and a 3.6-kb minor transcript in SNG-M cells and in human trophoblastic teratocarcinoma HT-H cells. Protein binding assays determined that bystin binds directly to trophinin and tastin, and that binding ... |
