| Produktbeschreibung      | The FAK (Phospho-Tyr397) Colorimetric Cell-Based ELISA Kit is a convenient, lysate-free, high throughput and sensitive assay kit that can detect FAK (Phospho-Tyr397) protein expression profile in cells. The kit can be used for measuring the relative ... |
| Detektionsbereich        | At least 5000 cells/well                                                                                                                                                                                                                                      |
