| Konjugation              | FITC                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | Assay Biotechnology secondary antibodies are available conjugated to enzyme, biotin or fluorophore for use in a variety of antibody-based applications including Western Blot, ImmunoHistoChemistry, ImmunoFluorescence, Flow Cytometry and ELISA. We offe... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Quelle                   | Polyclonal, Rabbit IgG                                                                                                                                                                                                                                        |
| Reinheit                 | The antibody was affinity-purified by affinity-chromatography using antigen-specific immunogen.                                                                                                                                                               |
| Formulierung             | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.                                                                                                                                                                                       |

Application Verdünnung

Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are IF (1:250 - 1:2000),
