| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FC, IF, WB                                                                                                                                                                                                                                                    |
| Spezies Reaktivität      | Bovine                                                                                                                                                                                                                                                        |
| Konjugation              | AbFluor 680                                                                                                                                                                                                                                                   |
| Produktbeschreibung      | Assay Biotechnology secondary antibodies are available conjugated to enzyme, biotin or fluorophore for use in a variety of antibody-based applications including Western Blot, ImmunoHistoChemistry, ImmunoFluorescence, Flow Cytometry and ELISA. We offe... |
| Quelle                   | Polyclonal, Rabbit IgG                                                                                                                                                                                                                                        |
| Reinheit                 | The antibody was isolated from antisera by immunoaffinity chromatography using antigens coupled to agarose beads.                                                                                                                                             |
| Formulierung             | 1 mg/ml, liquid in 0.01M Phosphate Buffered Saline, pH 7.2, containing 1% BSA, 50% glycerol, 0.02% Sodium Azide                                                                                                                                               |

|                        |                                                                                                                                                                                       |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | Suggested starting 1:50-1:1000 dilutions for most fluorescent applications, while 1:5000-20000 dilutions for fluorescent assays with LI-1:COR Odyssey equipment would be recommended. |
