| Immunogen                | Synthesized peptide derived from human Cytokeratin 8 AA range: 400-483                                                                                                                                                                                        |
| Produktbeschreibung      | keratin 8(KRT8) Homo sapiens This gene is a member of the type II keratin family clustered on the long arm of chromosome 12. Type I and type II keratins heteropolymerize to form intermediate-sized filaments in the cytoplasm of epithelial cells. The p... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| UniProt                  | <a href="#">P05787</a>                                                                                                                                                                                                                                        |
| Quelle                   | Mouse, Monoclonal IgG2a, kappa                                                                                                                                                                                                                                |
| Reinheit                 | The antibody was affinity-purified from ascites by affinity-chromatography using specific immunogen.                                                                                                                                                          |

|                        |                                                |
|------------------------|------------------------------------------------|
| Formulierung           | PBS, 50% glycerol, 0.05% Proclin 300, 0.05%BSA |
| Application Verdünnung | IHC 1:200-400. ELISA 1:500-5000                |
