| Spezies Reaktivität      | Human, Rat                                                                                                                                                                                                                                                    |
| Immunogen                | Synthesized peptide derived from human CD79a AA range: 100-226                                                                                                                                                                                                |
| Produktbeschreibung      | CD79a and CD79b form a heterodimer molecular complex. Together with the membrane surface immunoglobulin of B cells, they form the antigen recognition receptor of B cells, participate in the signal transduction of B cell activation, and can be a broad... |
