| Spezies Reaktivität      | Human                                                                                                  |
| Immunogen                | Human Glutathione S transferase                                                                        |
| Produktbeschreibung      | Rabbit anti-human Glutathione S transferase polyclonal antibody, protein G affinity purified...        |
| Klonalität               | Polyclonal                                                                                             |
| Reinheit                 | Purified                                                                                               |
| Formulierung             | Purified                                                                                               |
| Lagerung                 | Store at -20°C. Avoid repeated freeze/thaw cycles.                                                     |
| Target-Kategorie         | Glutathione S transferase                                                                              |
| Application Verdünnung   | To reconstitute, add appropriate volume of dIH2O to reach a final antibody concentration of 1.0 mg/mL. |

Anwendungsbeschreibung

A 26kDa band was detected in the Western blotting experiment (as shown on Fig.1) when the antibody was used at a 1:300,000 diluted concentration, and 2.5 µg GST antigen was loaded to the gel. The 26KDa band corresponds to the full length GST protein.
