| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                                              |
| Produktbeschreibung      | The cluster of differentiation (CD) system is a glycosyl phosphatidylinositol anchored membrane protein that belongs to the CD38 family.It is generally used in immunophenotyping. CD157 was discovered in a bone marrow stromal cell line where it facili...                      |
| Molekulargewicht         | 57.1 KDa                                                                                                                                                                                                                                                                           |
| NCBI                     | <a href="#">10588</a>                                                                                                                                                                                                                                                              |
| Reinheit                 | Greater than 95% as determined by reducing SDS-PAGE                                                                                                                                                                                                                                |
| Anwendungsbeschreibung   | Always centrifuge tubes before opening.Do not mix by vortex or pipetting.It is not recommended to reconstitute to a concentration less than 100µg/ml.Dissolve the lyophilized protein in distilled water.Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |
