| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | Together with its regulatory partners CCNH and MNAT1, CDK7 functions as an important serine/threonine kinase in cell cycle regulation and RNA polymerase II-mediated transcription. As the catalytic subunit of the CDK-activated kinase (CAK) complex, CD... |
| Molekulargewicht         | Approximately 25 kDa & 38 kDa & 44 kDa, based on SDS-PAGE under reducing conditions.                                                                                                                                                                          |
| Formel                   | 1022&902&4331(Gene_ID)P50613 (A2-F346)&P51946 (Y2-L323)&P51948 (D2-S309)(Accession)                                                                                                                                                                           |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
