| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Human AOPP. During the reaction, Human AOPP in the sample or standard competes with a fixed amount of Human AOPP on the solid pha... |
| Detektionsbereich        | 61.7-5000ng/mL                                                                                                                                                                                                                                                |
| Sensitivitaet            | 25.3ng/mL                                                                                                                                                                                                                                                     |
| Proben                   | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target-Kategorie         | AOPP                                                                                                                                                                                                                                                          |
