| Reinheit                 | > 95 % as determined by reducing SDS-PAGE.                                                                                                                                                                                                                 |
| Formulierung             | Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, pH 7.2. Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual. |
| Sequenz                  | Ser21-Gln356                                                                                                                                                                                                                                               |
