Product Datasheet

Native Bacillus licheniformis Protease: 7-15 Units/mg, lyophilized powder, CAS [[9001-92-7]] CRM-NATE-0633

Artikelname	Native Bacillus licheniformis Protease: 7-15 Units/mg, lyophilized powder, CAS [[9001-92-7]]
Artikelnummer	CRM-NATE-0633
Hersteller Artikelnummer	NATE-0633
Alternativnummer	CRM-NATE-0633-250,CRM-NATE-0633-100,CRM-NATE-0633-1
Hersteller	Creative BioMart
Kategorie	Biochemikalien
Produktbeschreibung	Protease catabolizes proteins by hydrolysis of peptide bonds. Proteases are inactivated by serine active-site inhibitors, such as phenylmethylsulfonyl fluoride (PMSF) and diisopropylfluorophosphate. Protease is a serine endoproteinase with a broad sp...
Konzentration	7-15 Units/mg
CAS Nummer	[9001-92-7]
Anwendungsbeschreibung	The product has been used with other enzymes for in situ proteolysis to produce crystals suitable for structure determination. It has also been used in the process of isolation of subsarcolemmal (SS) and intermyofibrillar (IMF) mitochondria that can be used for functional in vitro studies. This is a proteolytic enzyme isolated from the fermentation of Bacillus licheniformis. It is a serine endoproteinase with a broad specificity towards native and denatured proteins, and is active under alkaline conditions.
