| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | To date, six types of receptors, LPA1-6 have been identified and are responsible for most of the biological activities of LPA. Recent studies on gene targeting in mice and family diseases of these receptors revealed that LPA is involved in various pa... |
| Anwendungsbeschreibung   | Categories: Biochemical Reagents. Related: Inhibitor, Lysophosphatidic Acid. Ship 1 : Shipping Temp. Ship 2: Ambient Temperature                                                                                                                              |
