| Hersteller               | Krishgen Biosystems                                                                                                                                                                                                                                            |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                    |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | The GENLISA Human Phosphorylated Aurora Kinase A (P-AURA) ELISA includes features like: Ready to use protocol with break-apart wells for ease of use Standardisation and High Reproducibility Lot to Lot Consistency Accuracy and Precision Validated again... |
| Detektionsbereich        | 78.13 - 5000 pg/ml                                                                                                                                                                                                                                             |
| Sensitivitaet            | 31.2 pg/ml                                                                                                                                                                                                                                                     |
| Proben                   | Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. For tear samples, please connect with us to discuss further.                                                                                             |
| Anwendungsbeschreibung   | Colorimetric, Absorbance measured at 450nm                                                                                                                                                                                                                     |
