| Produktbeschreibung      | Anti-Mouse IgG1 (Fc), rVHH (N2504.M1FC) is a recombinant Alpaca VHH antibody that recognizes the Fc fragment of mouse IgG1, and is validated for IF, flow, and WB. Green fluorescent, STORM-compatible CF488A dye has Ex/Em at 490/515 nm. Unit size: 500 ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 100 ug/mL                                                                                                                                                                                                                                                     |
| Klon-Bezeichnung         | [N2504.M1FC]                                                                                                                                                                                                                                                  |
| Puffer                   | PBS, 0.1% rBSA, 0.05% azide                                                                                                                                                                                                                                   |

| Quelle                 | Animal                                                                                                                                                       |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | Immunofluorescence: 0.1 ug/mL, Flow cytometry: 0.1 ug per million cells/0.1 mL, Western blot: 250 ng/mL, Optimal concentration to be determined by end-user. |
