| Produktbeschreibung      | Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression.... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                           |
| Molekulargewicht         | Calculated MW:, Observed MW:According to the fused protein                                                                                                                                                                                           |
| Puffer                   | Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.                                                                                                        |
| Reinheit                 | Affinity Purification                                                                                                                                                                                                                                |
| Formulierung             | Liquid                                                                                                                                                                                                                                               |
